

LIVING DB POWERED

Hyper-Personalized Web Operations Platform

We turn static websites into intelligent, self-operating services. Upload HTML from any vibe-coding tool — our AI handles the rest: personalization, optimization, and 24/7 autonomous operation.

THE PROBLEM WE SOLVE

Vibe coding creates, but **can't operate**

Manual updates **costly for SMBs**

No personalization for visitors

80% of websites abandoned in 6 months

From Any HTML to Self-Operating Service

Whether from **Vibe Coding** (Claude, Cursor, v0) or **Pro Web Editors** (Z.STUDIO, Webflow) — our AI platform transforms static output into living, intelligent web services.

Any Source, One Platform

Upload HTML from Vibe Coding tools (Claude Artifacts, Cursor, v0, Bolt) or professional editors (Z.STUDIO, Webflow, Framer).

RAG-Based AI Engine

Retrieval-Augmented Generation provides context-aware responses and personalized content for each visitor.

Auto-Operation 24/7

Automated content updates, A/B testing, and conversion optimization — no coding or manual work required.

Why Now?

Vibe coding and AI tools can **create** websites — but they can't **operate** them.

- ✓ 2.1 billion websites globally, 65% built with No-Code/Low-Code
- ✓ Post-AI era births a new paradigm: Vibe Coding
- ✓ Static output needs intelligent operation layer
- ✓ We are that AI layer — transform static → living services
